1tr Engine Drive Belt - oud.mboutrecht.nl

Idler pulleys are engine pulleys that are responsible for guiding and tensioning the engine drive belts. The engine drive belts are routed in a specific manner around the various engine accessories, such as the alternator, water pump, power steering pump, and AC compressor. The idler pulley is meant to provide another smoothly rotating point for the engine belt to loop around, so that the ...

How to change the auxiliary drive belt on a Toyota Hilux Mk6 Vigo D4D

Without a drive belt, none of these parts would work. The purpose of drive belts is to deliver power between different engine components. They work by means of friction between the belt and pulley, which is why loose belts can cause various components to work poorly, or not at all.
